Subject index

Acetic acid,
——— adsorption on smooth Pt electrodes. Measuring the rate of double-layer organization and rearrangement (Krauskopf, Wieckowski) 295
Adsorbed intermediates,
electrochemical studies of electrode reaction ——— . Part I. Computerized potential step chronocoulometry on rotating disk electrodes (Wu, Sun) 35
Alkylammonium group-containing polypyrroles,
alkylammonium and pyridinium group-containing polypyrroles, a new class of electronically conducting anion-exchange polymers (Cosnier et al.) 69
Anion-exchange polymers,
alkylammonium and pyridinium group-containing polypyrroles, a new class of electronically conducting ——— (Cosnier et al.) 69

Bromate/sulphuric acid media,
oscillatory phenomena: spontaneous alternance of the occurrence of corrosion and passivation states of an iron electrode in ——— (D'Alba et al.) 49

Carbon dioxide
electroreduction of ——— on gas-diffusion electrodes modified by metal phthalocyanines (Furuya, Matsui) 181
Chaotic oscillations,
forced ——— in the reduction of $Fe(CN)_6^{3-}$ ions at a glassy carbon electrode (Varma, Upadhyay) 345
Charge density,
comments on the inner-layer capacity versus ——— curves (Hamelin, Stoicoviciu) 15
Chloride ions,
the influence of polyoriented gold electrodes modified by reversibly and irreversibly adsorbed ad-atoms on the redox behaviour of the Cr(III)/Cr(II) couple and the effect of ——— (Rodes et al.) 127
Chromate ion,
electrocatalytic reduction of ——— in alkaline media on Pt modified by underpotential deposition of heavy metals (Sazou, Kokkinidis) 221
Chromium ion,
the influence of polyoriented gold electrodes modified by reversibly and irreversibly adsorbed ad-atoms on the redox behaviour of the Cr(III)/Cr(II) couple and the effect of chloride ions (Rodes et al.) 127
Cobalt(III) cyclam,
an electrochemical study of the μ-peroxo complex of ——— (Ouyang, Anson) 331
Copper,
a voltammetric study of the electrodeposition chemistry in the ———+In+Se system (Mishra, Rajeshwar) 279
Corrosion,
oscillatory phenomena: spontaneous alternance of the occurrence of and passivation states of an iron electrode in bromate/sulphuric acid media (D'Alba et al.) 49
Current-scan polarography,
the electron transfer at a liquid/liquid interface studied by ——— at the electrolyte dropping electrode (Kihara et al.) 107
Cyclic voltammetry,
the ——— of some sulphonated transition metal phthalocyanines in dimethylsulphoxide and in water (Irvine et al.) 161
Cyclopentanol,
electrocatalytic oxidation of ——— on Pt and Pt surfaces modified by ad-atoms of heavy metals deposited at underpotentials (Kokkinidis, Papoutsis) 233

Dark redox reactions,
phenomenological description of ——— at electrodes covered with conducting polymer films. Part I. Mechanism and kinetics of ferrocene oxidation at polythiophene (Kazarinov et al.) 193

Diffusion–migration potential,
steady state ——— differences in mixed conductor polymer films and thin layer cells (Buck) 1
Dimethylsulphoxide,
the cyclic voltammetry of some sulphonated transition metal phthalocyanines in ——— and in water (Irvine et al.) 161
Diphthalocyanine films,
electrochemistry of lutetium crowned ether ——— (Bardin et al.) 173
Double layer,
acetic acid adsorption on smooth Pt electrodes. Measuring the rate of ——— organization and rearrangement (Krauskopf, Wieckowski) 295

Electrified interfaces,
is the position of the maximum adsorption defined unambiguously for ———? (Karolczak) 319
Electrolyte dropping electrode,
the electron transfer at a liquid/liquid interface studied by current-scan polarography at the ——— (Kihara et al.) 107
Electron transfer,
spectroelectrochemistry of a system involving two consecutive ——— reactions (Yap et al.) 325
The ——— at a liquid/liquid interface studied by current-scan polarography at the electrolyte dropping electrode (Kihara et al.) 107

Fast surface reaction,
——— study using ultramicroelectrodes (Chen et al.) 257
Ferrocene,
phenomenological description of dark redox reactions at electrodes covered with conducting polymer films. Part I. Mechanism and kinetics of ——— oxidation at polythiophene (Kazarinov et al.) 193

Gas-diffusion electrodes,
electroreduction of carbon dioxide on ——— modified by metal phthalocyanines (Furuya, Matsui) 181
Glassy carbon electrode,
a simple procedure for activating a ——— (Upadhyay) 339
Forced chaotic oscillations in the reduction of $Fe(CN)_6^{3-}$ ions at a ——— (Varma, Upadhyay) 345
Gold electrodes,
the influence of polyoriented ——— modified by reversibly and irreversibly adsorbed ad-atoms on the redox behaviour of the Cr(III)/Cr(II) couple and the effect of chloride ions (Rodes et al.) 127

Heavy metals,
electrocatalytic oxidation of cyclopentanol on Pt and Pt surfaces modified by ad-atoms of ——— deposited at underpotentials (Kokkinidis, Papoutsis) 233
Electrocatalytic reduction of chromate(VI) ion in alkaline media on Pt modified by underpotential deposition of ——— (Sazou, Kokkinidis) 221
Hexacyanoferrate ions,
forced chaotic oscillations in the reduction of ——— at a glassy carbon electrode (Varma, Upadhyay) 345
Hydrochloric acid,
investigation of ruthenium deposition onto a platinum electrode in ——— media (Szabó et al.) 269
Hydroxylated compounds,
electrosorption of ———: a comparative study of molecules with three carbon atoms (Sumodjo et al.) 305

Indium,
a voltammetric study of the electrodeposition chemistry in the Cu + ——— + Se system (Mishra, Rajeshwar) 279
Inner-layer capacity,
comments on the ——— versus charge density curves (Hamelin, Stoicoviciu) 15
Ion association,
steady state current flow in solid binary electrolyte cells. Part 2. The effect of ——— (Bruce et al.) 27
Iron electrode,
oscillatory phenomena: spontaneous alternance of the occurrence of corrosion and passivation states of an ——— in bromate/sulphuric acid media (D'Alba et al.) 49

Liquid crystal,
direct evidence for one-dimensional electric conduction of stacks of octa-*n*-dodecoxyphthalocyanine in the liquid crystalline phase (Sluyters et al.) 41

Liquid/liquid interface,
the electron transfer at a ——— studied by current-scan polarography at the electrolyte dropping electrode (Kihara et al.) 107
Lutetium crowned ether diphthalocyanine films,
electrochemistry of ——— (Bardin et al.) 173

Manganese dioxide films,
electroinduced structural changes in ——— + manganese hydroxide films as characterized by real-time surface-enhanced Raman spectroscopy (Gosztola, Weaver) 141
Manganese hydroxide films,
electroinduced structural changes in manganese dioxide + ——— as characterized by real-time surface-enhanced Raman spectroscopy (Gosztola, Weaver) 141
Many-body effects,
——— in electrosorption: some numerical consequences for partial charge transfer (Mishra et al.) 351
Maximum adsorption,
is the position of the ——— defined unambiguously for electrified interfaces? (Karolczak) 319
Metal phthalocyanines,
electroreduction of carbon dioxide on gas-diffusion electrodes modified by ——— (Furuya, Matsui) 181
Methanol,
high platinum electrocatalyst utilizations for direct ——— oxidation (Watanabe et al.) 213
Micelle,
catalytic current of bis(1,10-phenanthroline)cuprous complex micellized by sodium dodecyl sulphate (Sugiyama, Aoki) 249
Microperoxidase-11,
redox conversion of ——— on a silver electrode (Razumas et al.) 155
Mixed conductor polymer films,
steady state diffusion–migration potential differences in ——— and thin layer cells (Buck) 1
Molecules with three carbon atoms,
electrosorption of hydroxylated compounds: a comparative study of ——— (Sumodjo et al.) 305

Octa-*n*-dodecoxyphthalocyanine,
direct evidence for one-dimensional electric conduction of stacks of ——— in the liquid crystalline phase (Sluyters et al.) 41
One-dimensional electric conduction,
direct evidence for ——— of stacks of octa-*n*-dodecoxyphthalocyanine in the liquid crystalline phase (Sluyters et al.) 41
Oscillatory phenomena,
———: spontaneous alternance of the occurrence of corrosion and passivation states of an iron electrode in bromate/sulphuric acid media (D'Alba et al.) 49

Partial charge transfer,
many-body effects in electrosorption: some numerical consequences for ——— (Mishra et al.) 351
Passivation,
oscillatory phenomena: spontaneous alternance of the occurrence of corrosion and ——— states of an iron electrode in bromate/sulphuric acid media (D'Alba et al.) 49
μ-Peroxo complex,
an electrochemical study of the ——— of cobalt(III) cyclam (Ouyang, Anson) 331
bis(1,10-Phenanthroline)cuprous complex,
catalytic current of ——— micellized by sodium dodecyl sulphate (Sugiyama, Aoki) 249
Phthalocyanines,
the cyclic voltammetry of some sulphonated transition metal ——— in dimethylsulphoxide and in water (Irvine et al.) 161
Platinum,
acetic acid adsorption on smooth ——— electrodes. Measuring the rate of double-layer organization and rearrangement (Krauskopf, Wieckowski) 295
Electrocatalytic oxidation of cyclopentanol on Pt and Pt surfaces modified by ad-atoms of heavy metals deposited at underpotentials (Kokkinidis, Papoutsis) 233
Electrocatalytic reduction of chromate(VI) ion in alkaline media on ——— modified by underpotential deposition of heavy metals (Sazou, Kokkinidis) 221
High ——— electrocatalyst utilizations for direct methanol oxidation (Watanabe et al.) 213
Investigation of ruthenium deposition onto a ——— electrode in hydrochloric acid media (Szabó et al.) 269

Polymer films,
phenomenological description of dark redox reactions at electrodes covered with conducting ———. Part I. Mechanism and kinetics of ferrocene oxidation at polythiophene (Kazarinov et al.) 193
Steady state diffusion–migration potential differences in mixed conductor ——— and thin layer cells (Buck) 1
Polyoriented gold electrodes,
the influence of ——— modified by reversibly and irreversibly adsorbed ad-atoms on the redox behaviour of the Cr(III)/Cr(II) couple and the effect of chloride ions (Rodes et al.) 127
Poly(2-propylaniline),
———: an electroactive polymer, soluble in organic medium in the reduced state (Bidan et al.) 59
Polypyrroles,
alkylammonium and pyridinium group-containing ———, a new class of electronically conducting anion-exchange polymers (Cosnier et al.) 69
Polypyrrole films,
conducting ——— containing [Ru(2,2′-bipyridine)$_2$(3-{pyrrol-1-ylmethyl}pyridine)Cl]$^+$. Electrochemistry, spectroelectrochemistry, electronic conductivity, and ionic conductivity (Ochmanska, Pickup) 83
Polythiophene,
phenomenological description of dark redox reactions at electrodes covered with conducting polymer films. Part I. Mechanism and kinetics of ferrocene oxidation at ——— (Kazarinov et al.) 193
Potential step chronocoulometry,
electrochemical studies of electrode reaction adsorbed intermediates. Part I. Computerized ——— on rotating disk electrodes (Wu, Sun) 35
Pyridinium group-containing polypyrroles,
alkylammonium and ———, a new class of electronically conducting anion-exchange polymers (Cosnier et al.) 69

Redox conversion,
——— of microperoxidase-11 on a silver electrode (Razumas et al.) 155
Rotating disk electrodes,
electrochemical studies of electrode reaction adsorbed intermediates. Part I. Computerized potential step chronocoulometry on ——— (Wu, Sun) 35
Ruthenium,
investigation of ——— deposition onto a platinum electrode in hydrochloric acid media (Szabó et al.) 269
[Ruthenium(2,2′-bipyridine)$_2$(3-{pyrrol-1-ylmethyl}pyridine)chloride]$^+$,
conducting polypyrrole films containing ———. Electrochemistry, spectroelectrochemistry, electronic conductivity, and ionic conductivity (Ochmanska, Pickup) 83

Selenium,
a voltammetric study of the electrodeposition chemistry in the Cu + In + ——— system (Mishra, Rajeshwar) 279
Silver electrode,
redox conversion of microperoxidase-11 on a ——— (Razumas et al.) 155
Sodium dodecyl sulphate,
catalytic current of bis(1,10-phenanthroline)cuprous complex micellized by ——— (Sugiyama, Aoki) 249
Solid binary electrolyte cells,
steady state current flow in ———. Part 2. The effect of ion association (Bruce et al.) 27
Spectroelectrochemistry,
——— of a system involving two consecutive electron-transfer reactions (Yap et al.) 325
Steady state current,
——— flow in solid binary electrolyte cells. Part 2. The effect of ion association (Bruce et al.) 27
Steady state diffusion–migration potential,
——— differences in mixed conductor polymer films and thin layer cells (Buck) 1
Structural change,
electroinduced ——— in manganese dioxide + manganese hydroxide films as characterized by real-time surface-enhanced Raman spectroscopy (Gosztola, Weaver) 141
Sulphonated transition metal phthalocyanines,
the cyclic voltammetry of some ——— in dimethylsulphoxide and in water (Irvine et al.) 161
Surface-enhanced Raman spectroscopy,
electroinduced structural changes in manganese dioxide + manganese hydroxide films as characterized by real-time ——— (Gosztola, Weaver) 141

Thin layer cells,
steady state diffusion–migration potential differences in mixed conductor polymer films and ——— (Buck) 1

Ultramicroelectrodes,
fast surface reaction study using ——— (Chen et al.) 257
